

UNIVERSITY
of GUELPH

JUNE 7 - 8, 2011

Climate Change *and the* Implications for Plant Science

University of Guelph
- Rozanski Hall

The science, the impacts and the options

Please join the University of Guelph and CropLife Canada for an insightful symposium that will explore the latest science around climate change, its impact on agriculture and strategies that will allow the agriculture industry to provide leadership and solutions to this important issue. Leading researchers from around the world will share cutting-edge research and scientific thinking over two days of conference sessions. Optional hands-on workshops will take place on June 9th.
